$Z \sim N(0,1)$
Z is the number of standard deviations away from mean
$\lim_{t\to\infty} \frac{\partial}{\partial t} \int_0^{2\pi} \frac{t^2}{2}\, dt \leq \sum_{i=1}^{N} \frac{\pi i}{\sqrt{2}} \approx \Delta v t$
$\frac{\sin\theta}{\Theta} = \frac{\sin\varphi}{\Phi} = \frac{\sin\gamma}{\Gamma}$
